

Kingston Nelson

August 3, 2006 - March 29, 2024

Kingston came to us from the pound when he was 3 years old.

He was always an active dog, loving the cooler weather and jumping through the deep snow. He never met a dog he didn't give a play bow and put his arm across their shoulder.

Kingston had many toys to play with but his favorite was his ball. He would toss that ball to and fro so he could chase after it. He would throw it up in the air and around his neck just like a little Harlem globe trotter. Kingston never tired of bringing his ball to us to throw for a game of fetch.

Later his arthritis prevented him from being as active. When he got cataracts and dementia we would sometimes have to guide him over to his food dish.

One thing Kingston never forgot was his ball. He would pick it up take it up and down the hall and then lay it at our feet.

We will miss Kingston but know he is playing with other dogs and toys over the rainbow bridge.
